**Re: Proposal for Construction Management and Inspection Services
City of Bastrop –Various Projects**

Mr. Rosales,

Dial Development Services, Ltd. is pleased to present this proposal for construction management and inspection services during the construction of *“Various Projects” for Development and Capital Improvement Projects (CIP)* as listed below.

Construction Management and Inspection – Visits to the site will be provided on an as needed basis to observe the construction in progress. The site visit will provide an inspection of materials, equipment and construction work for ascertaining that the work is in conformance with the contract documents and the plans. The Inspectors are expected to know how to read and interpret plans and specifications and be able to evaluate work performed by contractor and compare it to the contracts’ documents.

Daily Reports – Construction activities inspected will be summarized in a daily report for its respective inspection. The daily reports will assist our staff as well as the design team in troubleshooting problems and will serve as a comprehensive report of all issues encountered on the project and how they were corrected. Photo documentation will also be kept and available as part of the project documentation. Documentation will be uploaded to the City of Bastrop’s MyGov system as part of project close out.

Construction Materials Testing – We will witness all necessary QC testing and ensure that testing meets specifications or provide corrective action recommendations prior to proceeding with work when testing does not meet specifications.

Construction Phase Project Meetings – We will attend and maintain active involvement in any and all meetings related to the above referenced project activities during construction, as required. This includes pre-construction meetings, on-site troubleshooting meetings, substantial completion and final walkthroughs, including developing any punch lists and any other necessary construction related meetings as they arise.

Project Documentation – As described, copies of all relevant project documentation such as daily reports and photographs will be kept and compiled. Documentation will be uploaded to the City of Bastrop's MyGov system as part of project close out. Review operating and maintenance manuals; and ensure that The City received all required documentation prior to the closeout of any project. Coordinate with project contractor/engineer's inspector, whichever is appropriate, on redlines for record drawings. Compare as built against redlines and request changes/adjustments where needed.

Construction Deficiencies – If construction deficiencies are noted during daily inspections, we will review the deficiencies and attempt to resolve the issues immediately with the contractor. Issues that cannot be resolved immediately will be discussed with the City Engineer, Director of Engineering and Capital Project Management, project owner or engineer and we will advise the owner or engineer of our opinion regarding the deficiency and the appropriate action.

Coordination of Stakeholders – As with all of our projects, Dial Development Services, Ltd. will make every attempt to include all of the project stakeholders in any given aspect of the project, as necessary. This serves to limit the number of possible issues that can arise during the project and keeps all parties current and fully informed of project progress and helps to identify potential issues that could arise. Coordinate with City Engineer and/or other contracted engineers, as well as project engineers, on a weekly basis or as needed, and provide any concerns to the Engineering and Capital Project Management Department. The Inspector shall not interact with public or reporters, but re-direct them to contact the Engineering and Capital Project Management Department.

Personnel and Equipment – Dial Development Services, Ltd. staff is highly experienced in construction inspection and management with over 75 years of combined experience. From standard specifications to community relations, we are seasoned in dealing with any issues that may arise during a project. Our staff has all of the necessary equipment to perform their job tasks in a safe, efficient and timely manner including but not limited to: industry standard personal protective equipment, various measurement devices pertinent to the project, and industry standard reporting materials. Key personnel resumes are available upon request.

The scope of services proposed for CIP projects where The City of Bastrop is the owner and/or Non-CIP projects where The City of Bastrop will be the owner after acceptance, shall include the following:

- Dial will have a Resident Project Representative (RPR) on site, either full-time or part-time dependent on the project or as requested in writing by The City of Bastrop.
- Schedules: Review the progress schedule, schedule of Shop Drawing submittals and schedules of values prepared by Contractor and consult with Engineer concerning acceptability.
- Conferences and Meetings: Attend meetings with Contractor, such as preconstruction conferences, progress meetings, job conferences, and other project-related meetings.
- Serve as City's liaison with Contractor, working principally through Contractor's superintendent and assist in understanding the intent of Contract Documents; and assist Engineer in serving as Owner's liaison with Contractor when Contractor's operations affect Owner's on-site operations.
