Dan- Hays-Clark, Chair   Susan Long, Vice-Chair
TITLE:
Consider action to approve a Certificate of Appropriateness for the exterior remodel, adding an elevator, at 1704 Main Street, also known as the Elbert S. Orgain House.

STAFF REPRESENTATIVE:
Jennifer C. Bills, AICP, LEED AP, Assistant Planning Director

ITEM DETAILS:
Site Address: 1704 Main Street (Attachment 1)
Property Owners: Ron Barclay
Applicant Contact: Doug Gaeke, Contractor
Current Use: Residence
Existing Zoning: Downtown Form-Based Code: Neighborhood
Designations: National Register of Historic Places and Local Significant Landmark

BACKGROUND/HISTORY:
The property at 1704 Main Street was build circa 1915 and is referenced as the Elbert S. Orgain House after the architect. The principle structure’s architectural style is Neo-Classical Revival. The property was listed in the National Register of Historic Places in 1977.

The property owner is planning to do interior renovations and add an elevator on the north side of the structure. This will requiring building a 4-foot by 15-foot addition that will house the elevator and landing area (Attachment 4).
The applicant has provided plans that show that the addition will match the existing wood siding and add windows that match the existing windows on the north face (Attachment 3).

The property owner would also like to extend the front entryway of the house on the first floor by 4 feet 7 inches (Attachment 4).

The existing doors will be reinstated and primary elements of the front porch, such as the existing columns and railing will remain.
POLICY EXPLANATION:
When a Certificate of Appropriateness is required, no work can begin before the Historic Preservation Officer or the Commission has first issued a Certificate of Appropriateness. The Certificate of Appropriateness shall be in addition to and not in lieu of any permits required (i.e. building, sign, alcohol, etc.). The Building Official cannot approve any application for a sign or building permit to a structure and/or site that requires, but does not have a Certificate of Appropriateness.

Code of Ordinances Chapter 14 – Zoning
Per Section 14.03.003 (f) Criteria of Approval of a Certificate of Appropriateness:
(1) In considering an application for a Certificate of Appropriateness, the commission shall be guided by any locally adopted design standards, and where applicable, the following from the Secretary of the Interior's Standards for the Rehabilitation of Historic Buildings. Any adopted design standards and Secretary of the Interior’s Standards shall be made to the property owners of historic landmarks.

(A) Every reasonable effort shall be made to adapt the property in a manner which requires minimal alteration of the building, structure, object, or site and its environment.

(B) The distinguishing original qualities or character of a building, structure, object, or site and its environment shall not be destroyed. The removal or alteration of any historic material or distinctive architectural features should be avoided when possible.

(C) All buildings, structures, objects, and sites shall be recognized as products of their own time. Alterations that have no historical basis and which seek to create an earlier or later appearance shall be discouraged.

(D) Changes that may have taken place in the course of time are evidence of the history and development of a building, structure, object, or site and its environment. These changes may have acquired significance in their own right, and this significance shall be recognized and respected.

(E) Distinctive stylistic features or examples of skilled craftsmanship which characterize, a building, structure, object, or site shall be kept to the greatest extent practical.

(F) Deteriorated architectural features shall be repaired rather than replaced, whenever possible. In the event replacement is necessary, the new material should reflect the material being replaced in composition, design, color, texture, and other visual qualities. Repair or replacement of missing architectural features should be based on accurate duplications of features, substantiated by historical, physical, or pictorial evidence rather than on conjectural designs or the availability of different architectural elements from other building or structures.

(G) The surface cleaning of structures shall be undertaken with the gentlest means possible. Sandblasting and other cleaning methods that will damage the historic building materials shall not be undertaken.

(H) Every reasonable effort shall be made to protect and preserve archeological resources affected by, or adjacent to, any project.

(I) Contemporary design for alterations and additions to existing properties shall not be discouraged when such alterations and additions do not destroy significant historical, architectural, or cultural material, and such design is compatible with
the size, color, material, and character of the property, neighborhood, or environment.

(J) Wherever possible, new additions or alterations to buildings, structures, objects, or sites shall be done in such a manner that if such additions or alterations were to be removed in the future, the essential form and integrity of the building, structure, object, or site would be unimpaired.

The proposed additions will use the same style and materials that currently exist on the structure and will blend with the historic architectural style. This project will allow the property owner to provide modern amenities for the residence while honoring the historic nature of the property.

RECOMMENDATION:
Consider action to approve a Certificate of Appropriateness for the exterior remodel, adding an elevator, at 1704 Main Street, also known as the Elbert S. Orgain House.
