Zoning Board of Adjustments
August 5, 2020 Meeting Minutes

- 3B. Public Hearing and consider action for the expansion of a Non-Conforming Site to add a 100-foot monopole communication tower at the same site of an existing 450-foot radio tower with adjacent equipment buildings, on 10.223 acres of Bastrop Town Tract A11, located at 2575 Cedar Street, within the City Limits of the City of Bastrop, Texas.

Jennifer Bills presented the information distributed in the Zoning Board of Adjustment Agenda Packet. She discussed the history of the site and the previous cell towers at that location.

Jennifer Bills discussed with the Board the notifications City Staff had sent out for the public hearing, and that a letter received from one of the surrounding property owners. Jennifer Bills stated Staff was recommending approval of the tower with the following conditions:

1. Applicant would Execute a Development Agreement with the City for the following:
2. Any future development beyond the scope approved by the Zoning Board of Adjustment will come into compliance with all Bastrop Building Block (B³) in effect at time of development.
3. Dedication of half (27.78 feet) of the right-of-way for Cedar Street along the northern property line.
4. The development process will be limited to the following with full review fees paid: Minor Plat with the right-of way dedication; Site Development Plan; and Building Permits.

The letter from the property owner at 2101 Cedar Street, Kristine Dugan, was read aloud for the record.

The Board discussed the purpose for the tower, which is to improve 911 communications.

Patrick Connell opened the Public Hearing.

The property owner at 2101 Cedar Street, Kristine Dugan, addressed the Board and further discussed her concerns that she listed in her letter. The Board asked if she would be more amenable to the proposed tower if there would be a condition put into place that ensured it would only be used for an emergency tower.

The property owner at 2101 Cedar Street, Matt Dugan, spoke before the Board stating he was not in favor of the cell tower being proposed to be placed on the tower.

Patrick Connell closed the Public Hearing.

Zoning Board of Adjustments August 5, 2020 Meeting Minutes

Discussion commenced between the Board and the Applicant (Steven Long). He answered questions for the Board including: the reason for the request is because the current tower is at max capacity, the proposed timeline (2-3 years) to get a new tower site that would be owned by the County so they could permanently move their equipment to their own site, the logistics for the monopole being proposed on the pre-existing tower site, the dedication of Right-Of-Way between the City and the Property Owner, and the removal of the proposed monopole from the property in the future.

Further discussion commenced among the Board.

Scot Robichaud made a motion to recommend approval for the expansion of a Non-Conforming Site to add a 100-foot monopole communication tower at the same site of an existing 450-foot radio tower with adjacent equipment buildings, on 10.223 acres of Bastrop Town Tract A11, located at 2575 Cedar Street, within the City Limits of the City of Bastrop, Texas with the following requirements:

1. Any future development beyond the scope approved by the Zoning Board of Adjustment will come into compliance with all Bastrop Building Block (B³) Code Requirements in effect at time of development,
2. The property owner will be required to dedicate half (27.78 feet) of the right-of-way for Cedar Street along the northern property line,
3. The development process will be limited to the following with full review fees paid: Minor Plat with the right-of way dedication; Site Development Plan; and Building Permits,
4. There will be no more than two dishes with supporting infrastructure allowed to be placed on the monopole,
5. The applicant is allowed to use this location for the monopole for five years starting on August 5, 2020, if the monopole is still operational in five years the applicant will need to come back before the Zoning Board of Adjustments to obtain approval for a continuance of use of the monopole at that location; and
6. The Applicant must have the monopole to completely removed from the site if they relocate their emergency communication to a new site prior to the five-year timeline set forth by the Zoning Board of Adjustments.

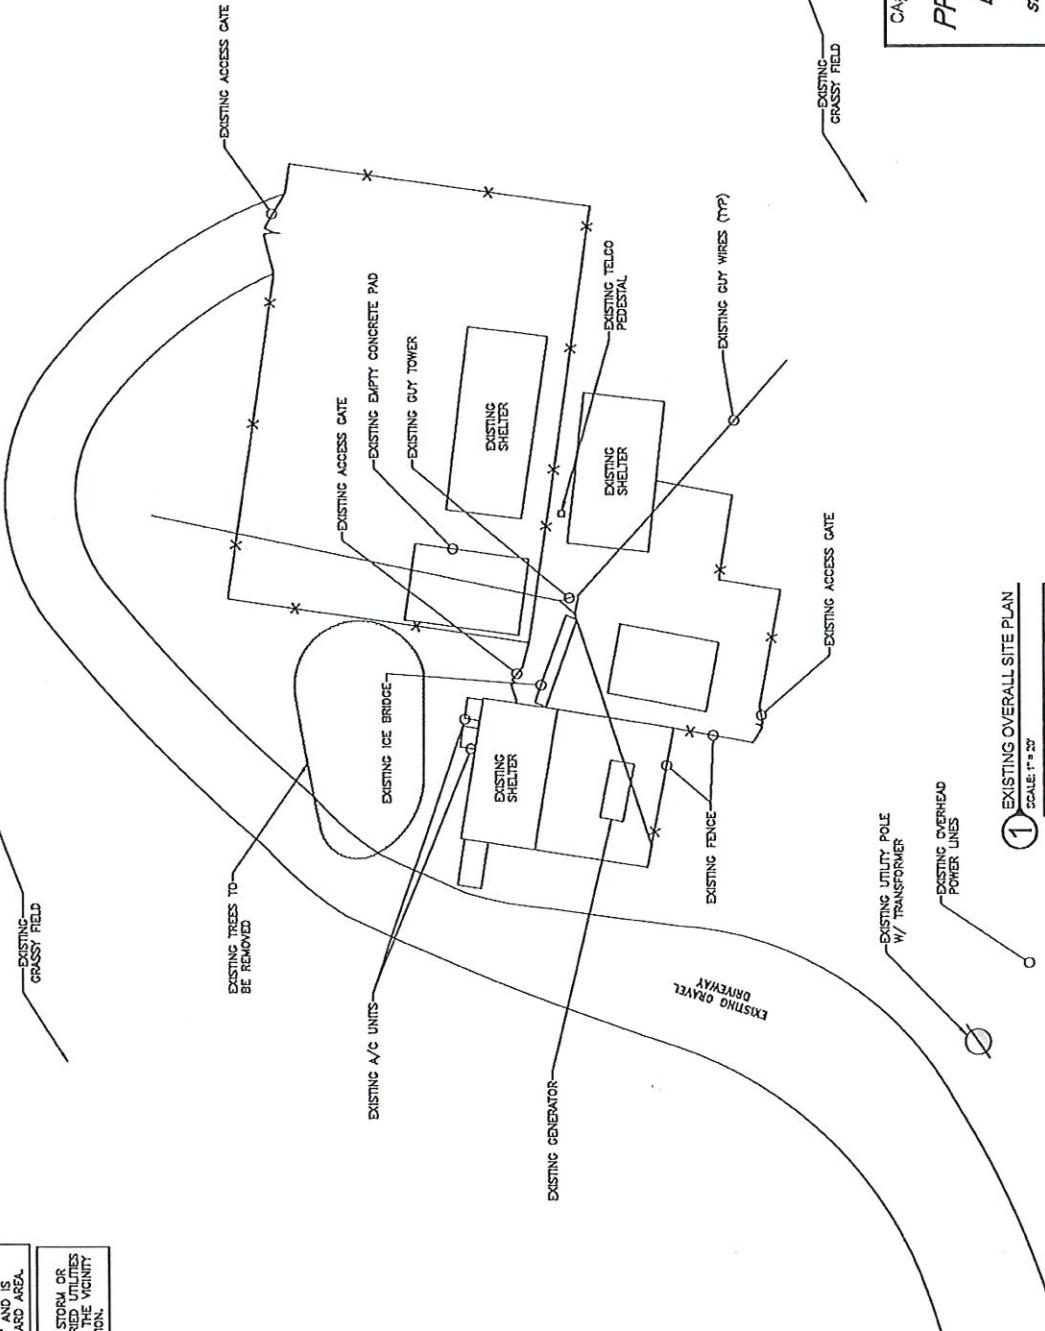

Gary Moss seconded the motion and the motion carried unanimously.
