- a) **Goals and Objectives of the Historic Landmark Commission for 2016; and**
- b) **Engage in needs assessment to identify tools needed to support the Historic Landmark Commission's efforts for submission to Council for consideration.**

The Commission would like design standards to support their effort in preservation and implementation of the Form Based Code (FBC). The Commission has proposed design standards in the past but they have never been formally adopted. The Commission realizes with

infill and changing codes, design standards will help with the preservation of our City. This would also allow the Commission to guide and support “infill” development within the City’s core.

Susan Long questioned when the plaque/marker for the fire plug located on the southeast corner of Main Street and Farm Street could be purchased. Susan also asked for a copy of the wording/story of the oldest operational fire hydrant to be emailed to her. Melissa McCollum said we just need to move forward with purchasing the marker.

The Commission would also like to identify structures that have not been designated
