

THE MAIN STREET REHABILITATION PROJECT

Overview

The Main Street Rehabilitation Project was unanimously approved by the Bastrop City Council on December 10, 2019, and will promote economic vitality, value, and growth for Downtown Bastrop. The project promises to increase the livability and walkability of Main Street and turn Downtown into a lively and vibrant community space to be enjoyed by generations of future Bastropians.

Project

The **Main Street Rehabilitation Project** encompasses sidewalk improvements or additions from Farm to Water Street, along with roadway resurfacing from Spring to Water Street. The upgrades will include the installation of street trees, widening of the walkways, installing new streetlights, and providing a planting strip. Project completion set for late summer with landscaping installation occurring in the early fall.

Building Bastrop

The **Main Street Rehabilitation Project** is the first Capital Improvement Project to be built under the Building Bastrop name. Building Bastrop began as a City of Bastrop initiative to guide responsible development that honors our authentic past and prepares for our sustainable future. Taking a comprehensive approach, Building Bastrop launched to create a new set of tools that will responsibly support the community for generations to come. Now that the Bastrop Building Block (B3) Codes are complete, City-based development can occur under the Building Bastrop name, still honoring the tenets of proactively managing growth, investing in sustainable infrastructure, and encouraging responsible development.
