

RESIDENT QUESTIONNAIRE

CITY OF BASTROP – DRAINAGE MASTER PLAN

The City of Bastrop has a history of flooding in some areas due to inadequate drainage infrastructure. The City has requested Half Associates, Inc. to prepare a Drainage Master Plan to effectively address drainage improvements. As part of the development of the Drainage Master Plan, we are seeking public input to identify areas of flood concern within the City and thoughts regarding Drainage Funding for the City. Please fill out the following two sections of the questionnaire. Your input, in combination with detailed modeling, will be beneficial for the City to develop a comprehensive drainage master plan and be the basis of developing drainage solutions.

Name: _____

Address: _____

How long have you lived at this property?: _____

Phone/Email: _____

DRAINAGE/FLOODING QUESTIONS

1. Is your residence within the FEMA regulated floodplain?

- Yes No Unsure

2. Please indicate to the best of your knowledge the dates, depths and location of flooding that has occurred at your address.

Date: _____ Depth _____ House Yard Street Crawl Space

Date: _____ Depth _____ House Yard Street Crawl Space

Date: _____ Depth _____ House Yard Street Crawl Space

3. Where is water entering your home?

- Door Garage Walls Windows Floor Cracks

4. Please provide any other observations or comments you have relating to flooding or general storm drainage issues in your area including any street flooding with estimated duration of flooding.
-
-

5. Photos are also helpful. Do you have photos or videos from the flooding you would like to provide? Please send your photos, videos, or any questions, to Marita Moya by email at marita.moya@halff.com.

DRAINAGE FUNDING QUESTIONS

1. Do you think the City needs to fund Stormwater and Drainage activities?
- Yes No Unsure
2. Do you agree in principle, that a user fee that directly relates a drainage fee to the relative stormwater runoff is a good way for the City to fund or partially fund stormwater and drainage infrastructure? To clarify with a simple parking lot example, a commercial property with parking for 40 cars could generate 4 times more runoff than a parking lot for 10 cars so the fee would also be 4 times more.
- Yes No Unsure
3. Would you favor additional property taxes as the primary means to fund or partially fund stormwater and drainage infrastructure?
- Yes No Unsure
